

Roll-out process

When Silverbucket is taken into usage, a clear resourcing process and suitable data are essential. Easy and successful roll-out can be achieved through these five explained steps.

The Process

Define your allocation process with responsible roles. Also choose how to group your personnel.

STEP
01

STEP
02

The Environment

Together we will import your data and user rights into your own environment.

STEP
03

The Training

With your own data in place, we can train both basic and admin users.

STEP
04

The Production

Let's roll-out your process. Allocate and report.

STEP
05

The Journey

More trainings & fine tuning of the process and tool.
